

Join Sage City Live roundtable host: **Brandon Gabert**

Information Systems Manager for Guardian Chemicals Inc.—a manufacturing company near Edmonton, Alberta, Canada—Brandon Gabert has been with the company for ten years and was the onsite lead for implementing Sage ERP X3.

When asked to oversee the project, Brandon had a computer background but no accounting experience. Undeterred, he took night classes to get up to speed while the implementation was being executed. A real challenge to juggle both the implementation and school, he credits the support of his wife, Kerri (and their two dogs, Molly and Charlie), with helping him do it—an accomplishment that gave him the same appreciation and passion for accounting as he's always had for computers.

In the three years since then, Brandon has continued to improve the company's processes by taking advantage of the high configurability of Sage ERP X3 as a problem-solving tool as well as taking additional accounting courses.

In his free time, Brandon enjoys being with his wife and their one-year-old son, Lucas, as well as Molly and Charlie, who love Lucas as much as they do, though they're sure his first words will be "No Molly!"
